

Grad-Aura

Exclusive Collection of Technological Innovations

DOMAINS

HARDWARE

- Embedded Hardware Prototyping
- Microcontroller / Microprocessor Based System Design
- Hardware Testing and Validation
- IoT Hardware Integration
- Firmware-Hardware Interface Support

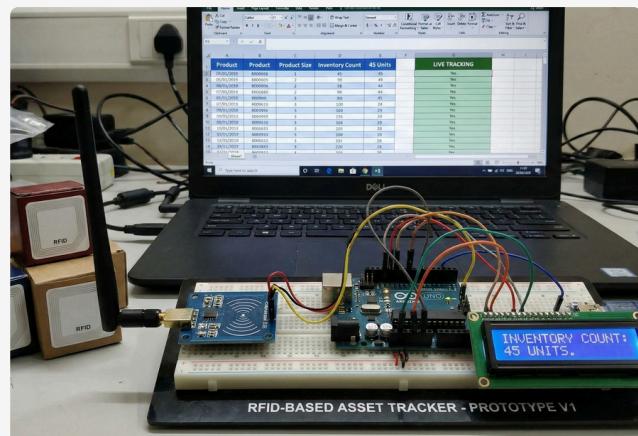

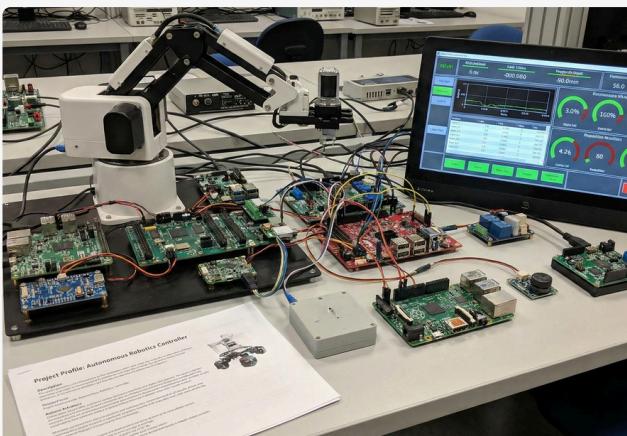

SOFTWARE

- Machine Learning Model Development and Deployment
- Data Analytics and Visualization using Python, R, Power BI, Tableau
- Front-end and Back-end Application Development
- Android and iOS App Development

DOCUMENTS

- Business Case Studies and Market Research Reports
- Technical Project Reports with Simulation and Analysis
- Research Paper Writing as per IEEE Format
- Error Detection and Fixing for Embedded, Web, App, and ML Codes

SERVICES

EMBEDDED SYSTEMS

Embedded systems are the silent brains behind modern machines, turning raw hardware into intelligent action.

EMBEDDED SYSTEMS & IOT

Embedded Systems & IoT transform ordinary devices into intelligent, connected solutions that think, act, and communicate.

SERVICES

DATA SCIENCE

Data Science turns raw data into powerful insights, revealing patterns that drive smarter decisions and innovation.

APP AND WEB DEVELOPMENT

App and Web Development bring ideas to life, crafting digital experiences that connect people, businesses, and technology.

TRANSFORM YOUR CAREER WITH TECHNOLOGY!
